[UPlan](#)

New on the Data Portal:

See an updated Data Guide that can help users find new data

Check out the improved Auto Report Generator Tutorial available on the training link

To request a new data layer:

Just click on the 'Request a Layer' button on the [Data Portal](#) and fill out an online request form.

The UDOT Data Portal is a one-stop shop for GIS data, applications, news and training.

GIS tools work: Region Four WASHTO Award

UDOT Region Four's Pre construction Team has developed GIS tools that support and enable communication and better decisions, and charts a path for other work groups at UDOT to exploit GIS capabilities more fully. Read about the tools on the [UDOT Blog](#).

Google UDOT

UDOT has partnered with the [Automated Geographic Reference Center](#) and other state agencies to acquire high resolution Google images for use with UPlan maps. The images will improve as the technical details of the contract continue to be worked out. View the images [here](#).

Region map galleries

There is now an image of the State of Utah with clickable links to maps of each region with projects UDOT Region Map Galleries.

Simply click on a Region to view relevant maps and apps identified by Region GIS staff. If there is additional content you would like to see in the gallery please contact Region GIS staff. Additional galleries organized by departments will be coming soon.

UPlan functionality: Zoom Scales

When a zoom scale is set, the layer name under the Contents tab will be gray until you zoom in enough for the layer to draw. It will then turn to the normal shade of black. This enhancement will help identify why a layer may not be drawing.

Upon opening a service with a set zoom scale, UPlan will now automatically zoom in so the features will draw.

New look for Open Data

Open Data's home page has been streamlined for easier searching. In addition to the search bar in the upper left corner, you can now click on one of the icons in the center of the page to access data from various categories.
