[UDOT Projects](#)

[UPlan](#)

### Request a new data layer:

Just click on the 'Request a Layer' button on the [Data Portal](#) and fill out an online request form.

**The UDOT Data Portal is a one-stop shop for GIS data, applications, news and training.**

### New Explorer App Boldly Goes

**Explorer for ArcGIS, available for iOS and Android devices, is a new app for interacting with UDOT data.**

ArcGIS for iOS and Android were the first apps provided by ArcGIS Online for using UDOT's UPlan maps on a mobile device. A new app, Explorer, is the most current app, and the only app that will be continually updated with new features. For more information, see the [FAQ](#) page on the ESRI website and this [video](#) for instructions to download the app.

### Where's Marwan?

Adrian Welsh created a new map that lets users find project personnel assignments more easily. The map is populated by ePM, and includes active project data. Users can filter information by relevant project dates (start, end, etc), resident engineer (RE) or project manager (PM).

**Find the map in the Region Two Map Gallery:** from UPlan, click Region Two in the gallery finder in the top right corner. Scroll down to "Region Two Projects Filter App."

### Unified Plan State Funding Map

**A new map lets users find out how UDOT Unified Plan projects are funded.**

Utah's Unified Transportation Plan lists 30-year needs for capacity, maintenance, operations and transit needs for

rural and metropolitan areas. The map shows UDOT projects from the Unified Plan and the UDOT Projects website.

**To find the map** from UPlan, enter "Unified Plan State Funding Map" in the search field in the top right corner.
