

## PROJECT OVERVIEW

The Utah Department of Transportation (UDOT) intends to reconstruct the I-84/US-89 Interchange. It is the Department's intention to advertise this project as a Design Build contract. This project will reconstruct the interchange into a SPUI. This project will also reconstruct a structure over the Weber River. This will be a fast paced project with the environmental, design and ROW being cleared within 18 months, with construction anticipated beginning late 2022

## BENEFITS

With current volumes at this interchange reaching over 42,000 AADT the traffic can back up for more than a mile on north bound US-89. This delay is anticipated to increase when the US-89 reconstruct and widening project gets completed. By adding this work to that project and completing it simultaneously we can avoid even more delays and safety issue when cars are stopping a considerable distance from the interchange. This project will improve safety and mobility at this interchange.

## FUNDING

Design/Construction	\$60 M
<b>Total Cost</b>	<b>\$60 M</b>

## SCHEDULE *(subject to change)*

- Environmental/Design Starts: **2022**
- Construction Starts: **2023**
