

Crews placing bridge girders at north portal during summer 2020

### PROJECT OVERVIEW

UDOT is building four new bridges on U.S. 40 to provide access and mobility for new developments on both sides of the highway in the Mayflower area. These developments are part of a military installation development area plan. This project will build one access (portal) under U.S. 40 north of the existing Mayflower interchange, and another undercrossing (portal) south of the existing Mayflower interchange.

All four bridges are in place and in spring crews will seal the bridge decks with the final driving surface and complete the retaining walls at each location. Work is scheduled to be complete in summer 2022.

### BENEFITS

When completed, these bridges will improve area mobility by providing two undercrossings for local travel between Deer Valley and Jordanelle State Park and will reduce congestion at the Mayflower interchange.

### FUNDING

UDOT TIF	\$16.7M
Transportation Sol	\$1.05M
<b>Total Cost</b>	<b>\$17.75M</b>
