

PROJECT OVERVIEW

Transportation Investment Fund
Widen Existing Facility

I-15 MP 6.3 to 8.8 Northbound and Southbound
Possible New Interchange at 700 South (Exit 7)

BENEFITS

Widen I-15 to 3 lanes in each direction to increase capacity and inline structures at 100 S. and 700 S.

The existing interstate is two lanes, congestion continues to increase through this section of the corridor due to growth and recreation attractions. The addition of the new interchange would provide another access to St. George City, relieving Exits 6 and 8.

The local government is highly interested in a possible interchange and would provide support where they are able. It would provide relief to local surrounding roads by providing closer access to the interstate.

FUNDING	
Total Cost	\$68.7 Million
