

## PROJECT OVERVIEW

Highway Safety Improvement Program  
Convert signalized intersection to roundabout

SR-9 MP 12.46 / SR-17 MP 0.0

## BENEFITS

Roundabouts are safer and more efficient than conventional intersection designs. They lower the speeds of vehicles moving through the intersection and reduce the number and severity of conflict points, essentially eliminating angle crashes at the intersection. They are also designed to improve safety for all users, including pedestrians.

## FUNDING

Total Cost

\$2,800,000
