

Aerial view of the Collector-Distributor System at the 9000 South interchange.

PROJECT OVERVIEW

On northbound I-15, between the 9000 South on-ramp and the I-215 exit, there are multiple weaving movements taking place as cars enter and exit the interstate. This UDOT project will alter some of those movements and relocate others to provide a safer and more efficient transition for motorists entering and exiting I-15 between 9000 South on-ramp and I-215 off-ramp.

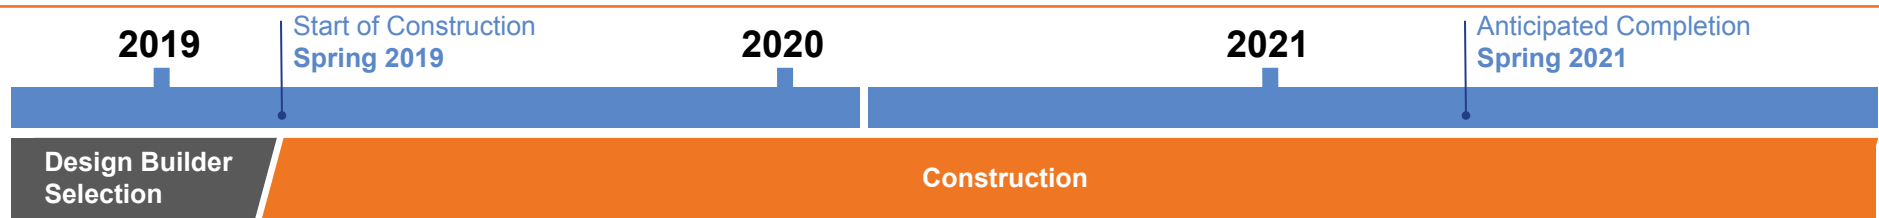

The project will add a general purpose lane from Bangerter Highway to 9400 South and a Collector-Distributor System from 9400 South to I-215/7200 South.

BENEFITS

- Increase mobility
- Reduce congestion along I-15
- Improve overall safety

FUNDING	
I-15 Northbound; Bangerter Hwy to I-215 (Phase 1)	\$171M
Total Cost	\$171M

SCHEDULE *(subject to change)*

I-15 Northbound - AM Peak Hour Average Speed
